Kickstart summer with these savings tips

A few small steps could help you save energy, which may also lower your bill.

Monitor your usage with My Account – Track your usage with easy-to-read graphs, helping you better control your usage.

Weatherize your home – Sealing air leaks around windows, doors, and vents could help save energy and make your home more comfortable. Take advantage of the warmer weather to complete these home projects before the winter heating season.

Turn down the heat – Lower your water heater setting to 49 Celcius (120° F), the Public Health Agency of Canada's recommendation for comfort and energy efficiency.

Invest in smart tools – Smart thermostats use technology to help you save.

Meter exchange program

Did you know Liberty is mandated by Measurement Canada to replace natural gas meters periodically to ensure safety and accuracy of measurement? When it is time for your meter to be exchanged, we will contact you to schedule an appointment that is convenient for you. Meter exchanges typically take 90 minutes to complete and there is no charge for this service.

For more information, visit www.libertyenergyandwater.com or scan the QR code.

Summer projects start with safe digging

Whether it's a big project like adding a swimming pool or just planting some new shrubs around your yard, **visit www.clickbeforeyoudig.com before you grab the shovel!** Your property may contain underground utility lines. Knowing where utility lines are buried can help you avoid injury, service outages (and unhappy neighbours), and costly repairs.

Visit www.clickbeforeyoudig.com a few days prior to digging. Complete the online Locate Request and enter where you'll be digging, what type of work you're doing, and when. Within just a few days, local utility companies (like us) will visit your site and mark the location of any underground lines, free of charge.

Visit www.clickbeforeyoudig.com or call 1-866-344-5463 to get started.
