**Re: Proposed Natural Gas Pipeline Installation for Dorchester, New Brunswick**

To Whom It May Concern,

Correctional Service Canada (CSC) supports the proposed installation of a natural gas pipeline from Sackville to Dorchester. New opportunities in line with clean energy alternatives are more and more welcome by the public, institutions and businesses.

In accordance with the Government of Canada's Federal Sustainable Development Strategy (FSDS, 2008) as well as CSC's ongoing Environmental Commitments, we are continuously looking forward to assess and/or implement projects that can minimize our corporate environmental footprint, in particular any cost-effective initiatives that may contribute to the reduction of greenhouse gases (GHG), NO<sub>x</sub> and SO<sub>x</sub> emissions. As you may know, Dorchester Penitentiary's central heating plant boilers currently rely on heavy fuel (i.e. Bunker-C #6). Hence, the option of converting the heating equipment to natural gas at Dorchester and Westmorland institutions has the potential to significantly improve CSC's environmental performance in this area.

In conclusion, CSC wishes to reiterate its support to Enbridge Gas New Brunswick Inc. in its endeavour to supply the Dorchester area with natural gas. As this becomes reality, please rest assured that CSC is committed to expedite the implementation of this conversion project.

If you require additional information, please do not hesitate to contact our Project Leader, Mr. David MacPherson, CSC Regional Headquarters (Moncton) at 506-851-4151.

Sincerely,

Élisabeth Baril, P.Eng., M.P.A.  
Director, Capital Projects Implementation
