Statement of Budgeted Income for Regulatory Purposes  
For the year ended December 31, 2013

---

(in thousands of dollars)

	<u>2013</u>
<b>Revenue</b>	
<b>Operating Revenue</b> (Note 8)	
Gas distribution	\$ 42,545
Miscellaneous	175
<b>Allowance for Funds Used During Construction</b>	<u>42</u>
	42,762
<b>Installation Service</b>	
Revenue	590
Cost of goods sold	<u>(383)</u>
	207
<b>Total Revenue</b>	<u>42,969</u>
<b>Expenses</b>	
<b>Operating Expenses</b>	
Operating and maintenance expenses (Note 9)	14,030
Bad debt expense	230
<b>Amortization of Property, Plant and Equipment</b>	7,466
<b>Municipal and Other Taxes</b>	1,195
<b>Interest on Amounts Due to Associates &amp; Affiliates and Other Interest</b> (Note 10)	8,464
<b>Amortization of Deferred Development Costs</b>	<u>2,908</u>
<b>Total Expenses</b>	<u>34,293</u>
<b>Income before Extraordinary Items, Regulatory Deferral and Return on Rate Base</b>	8,676
<b>Regulatory Deferral</b>	<u>-</u>
<b>Income before Tax</b>	<u>\$ 8,676</u>
<b>Tax</b>	<u>-</u>
<b>Regulated Return on Equity</b> (Note 11)	<u>\$ 8,676</u>

Financial Statement Effects of Rate Regulation and Legislative Changes – Note 1  
Details of Affiliate Transactions – Note 14

(in thousands of dollars)

**Note 1 Financial Statement Effects of Rate Regulation and Legislative Changes**

The Partnership's primary business activities are subject to regulation by the New Brunswick Energy and Utilities Board (EUB). The Partnership follows accounting practices prescribed by its regulator or stipulated in approved ratemaking decisions that are subject to examination and approval by the EUB and are similar to those being used by other enterprises in the gas distribution industry in Canada. Accordingly, the timing and recognition of certain revenues and expenses may differ from that otherwise expected under generally acceptable accounting principles (GAAP) applicable to non-regulated operations. The ultimate recoverability of costs incurred is dependent upon the approval of the EUB.

Rate regulation creates differences between the manner in which the Partnership accounts for transactions or events and how they would be accounted for if the Partnership was not subject to rate regulation. The differences in accounting treatment include:

The EUB permits an "allowance for funds used during construction" (AFUDC) to be included in the rate base. In addition, AFUDC is included in the cost of property, plant and equipment and is depreciated over future periods as part of the total cost of the related asset, based on the expectation that depreciation expense, including the AFUDC component, will be approved for inclusion in future rates. AFUDC for rate-regulated entities includes both an interest component and a cost of equity component. In the absence of rate regulation, GAAP would permit the capitalization of only the interest component. Therefore, the initial set up of the equity component as a capitalized asset and the corresponding revenue recognized during the construction phase would not be recognized nor would the subsequent depreciation of the asset.

As prescribed by the EUB, the Partnership does not recognize gains and losses on the sale of all of its natural gas in the statement of income and uses a purchase gas variance account to defer the gain or loss on sale. Non-regulated enterprises would normally account for the gain or loss in the statement of income or comprehensive income.

Enbridge Inc., on behalf of the Partnership, maintains a pension plan which provides defined benefit pension benefits to employees. As prescribed by the EUB, contributions made to the plan are expensed as paid, consistent with the recovery of such costs in rates. Under GAAP, pension costs and obligations for defined benefit pension plans are determined using the projected benefit method and are charged to income as services are rendered.

The Partnership had been subject to non-traditional regulation which recognized its immature nature. Unlike many similar utilities, the Partnership's rates were not set on a cost based methodology. Prior to October 1, 2012, the Partnership's rates were set exclusively based upon a market based methodology, and were based on a targeted savings over alternate fuel for end use customers. This rate setting methodology had been approved by the EUB for use during the development period after which rates are expected to be cost based.

(in thousands of dollars)

**Note 1      Financial Statement Effects of Rate Regulation and Legislative Changes (continued)**

In December 2011, the Province of New Brunswick introduced legislation that outlined new rate classes, and a new rate setting methodology for the Partnership. The legislation subsequently received proclamation on January 18, 2012, with the supporting Regulation being filed April 16, 2012. As a result of the legislation, effective March 1, 2012, the Partnership was directed to combine the Small General Service Residential Oil (SGSRO) and Small General Service Residential Electric (SGSRE) rate classes into a single Small General Service Residential (SGSR) class and apply the SGSRE distribution rate to all customers. In addition, effective October 1, 2012, the Partnership was directed to establish new rate classes for all customers, with rates to be based on the lesser of the market based rate, or the cost of service rate with an allowed multiplier to allow for a level of cross-subsidization with a revenue to cost ratio not exceeding 1.2:1 for any class of customer. The regulation also stipulated the target savings level and alternative fuel sources to be used in determining the market based rates.

The legislation noted above also provided direction with regards to the regulatory deferral account, which the EUB had historically approved to capture the difference between the Partnership's regulated revenues and its revenue requirement, which non-regulated enterprises would not recognize. Based on the legislative changes, the Partnership is no longer permitted to depreciate, amortize, earn a return on, or otherwise consider, the regulatory deferral account when calculating its revenue requirement. In response to this legislation the Partnership has not recorded any adjustments to the regulatory deferral account and it will not be considered for the purpose of establishing the revenue requirement, however it will remain as an asset on Enbridge Gas New Brunswick balance sheet as it remains an asset of the Partnership for regulatory purposes. Similarly, the capital structure associated with the regulatory deferral account will also remain on the balance sheet, however, the debt and equity associated with the regulatory deferral account are not considered when calculating the allowed rate of return for the Partnership.
