Financial Statement Effects of Rate Regulation and Legislative Changes – Note 1 Details of Affiliate Transactions – Note 14

Notes to 2017 Budget Regulatory Financial Results For the year ended December 31, 2017

1 Note 1 Financial Statement Effects of Rate Regulation and Legislative Changes

- 2 The Public Utility's primary business activities are subject to regulation by the New Brunswick Energy
- 3 and Utilities Board (EUB). The Public Utility follows accounting practices prescribed by its regulator or
- 4 stipulated in approved ratemaking decisions that are subject to examination and approval by the EUB
- 5 and are similar to those being used by other enterprises in the gas distribution industry in Canada.
- 6 Accordingly, the timing and recognition of certain revenues and expenses may differ from that otherwise
- 7 expected under generally accepted accounting principles (GAAP) applicable to non-regulated
- 8 operations. The ultimate recoverability of costs incurred is dependent upon the approval of the EUB.
- 9 Rate regulation creates differences between the manner in which the Public Utility accounts for
- 10 transactions or events and how they would be accounted for if the Public Utility was not subject to rate
- 11 regulation. The differences in accounting treatment include:
- 12 The EUB permits an "allowance for funds used during construction" (AFUDC) to be included in the rate
- 13 base. In addition, AFUDC is included in the cost of property, plant and equipment and is depreciated
- 14 over future periods as part of the total cost of the related asset, based on the expectation that
- depreciation expense, including the AFUDC component, will be approved for inclusion in future rates.
- 16 AFUDC for rate-regulated entities includes both an interest component and a cost of equity component.
- 17 In the absence of rate regulation, GAAP would permit the capitalization of only the interest component.
- 18 Therefore, the initial set up of the equity component as a capitalized asset and the corresponding
- 19 revenue recognized during the construction phase would not be recognized nor would the subsequent
- 20 depreciation of the asset.
- 21 As prescribed by the EUB, the Public Utility does not recognize gains and losses on the sale of Enbridge
- 22 Utility Gas (EUG) in the statement of income and uses a purchase gas variance account to defer the
- 23 gain or loss on sale. Non-regulated enterprises would normally account for the gain or loss in the
- 24 statement of income or comprehensive income.
- 25 Enbridge Inc., on behalf of the Public Utility, maintains a pension plan which provides defined benefit
- 26 pension benefits to employees. As prescribed by the EUB, contributions made to the plan are expensed
- 27 as paid, consistent with the recovery of such costs in rates. Under GAAP, pension costs and obligations
- 28 for defined benefit pension plans are determined using the projected benefit method and are charged to
- 29 income as services are rendered
- 30 The legislation noted above also provided direction with regards to the regulatory deferral account, which
- 31 the EUB had historically approved to capture the difference between the Public Utility regulated
- 32 revenues and its revenue requirement, which non-regulated enterprises would not recognize. Based on
- 33 the legislative changes, the Public Utility is no longer permitted to depreciate, amortize, earn a return on,
- 34 or otherwise consider the regulatory deferral account when calculating its revenue requirement. In
- 35 response to this legislation, the Public Utility has not considered the deferral account for the purpose of
- 36 establishing the revenue requirement. However, it will remain as an asset on Enbridge Gas New
- 37 Brunswick's balance sheet as it remains an asset of the Public Utility for regulatory purposes. Similarly,
- 38 the capital structure associated with the regulatory deferral account will also remain on the balance
- 39 sheet. However, the debt and equity associated with the regulatory deferral account are not considered
- 40 when calculating the allowed rate of return for the Public Utility.
